Workshop on Effective College Teaching Through Active and Cooperative Learning

A one and a half day workshop
January 19-20, 2016 (lunches provided)
Jackson Avenue Center
Conducted by Drs. Richard Felder and Rebecca Brent.

Drs. Richard Felder and Rebecca Brent have presented over 400 faculty development workshops throughout the U.S. and abroad on effective teaching, mentoring, and faculty development. Their workshops, while intended primarily for participants in engineering and the physical, mathematical, and biological sciences, cover techniques that apply to a wide range of disciplines.

Dr. Richard M. Felder is Hoechst Celanese Professor Emeritus of Chemical Engineering at North Carolina State University, Raleigh, North Carolina. He is a coauthor of *Elementary Principles of Chemical Processes* (4th edition, Wiley, 2015), which since 1978 has been used as the introductory chemical engineering text by roughly 90% of American universities, and he has authored or coauthored over 250 education-related papers and "Random Thoughts" columns as well as numerous papers on chemical process engineering.

Dr. Rebecca Brent is President of Education Designs, Inc., a consulting firm in Cary, North Carolina. Her areas of expertise are faculty development in engineering and the sciences, evaluation of educational programs at both precollege and college levels, and classroom uses of instructional technology.

This program is part of the University of Mississippi’s STEM Initiative.
